

Guide for further development

We recommend using PyCharm for easier setup.

1. Open Pycharm
2. If you already have an open Project, click on file → close project
3. Click on Get from Version Control and paste in
"https://gitlab.com/add-IV/ExerciseMgr.git"
4. Click on clone
5. Install python 3.7 and create an environment for the project
6. Install requirements.txt
